IVAN GENES

Senior Full-Stack Engineer | Node.js, TypeScript, NestJS | Svelte, Angular & React | AWS & Microservices

+54 9 3704 617941 | ivangenes@gmail.com | linkedin.com/in/ivan-genes | Greater Buenos Aires

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 8+ years of experience building web applications, REST APIs, microservices, and distributed systems for cross-border e-commerce, logistics, insurance, and automotive projects. Main stack: TypeScript/JavaScript with Node.js and NestJS, with frontend experience using Svelte, Angular, and React. I work across backend services, frontend features, authentication flows, integrations, and automated testing. Experienced with AWS (DynamoDB, SQS, EventBridge), RabbitMQ, Docker, CI/CD, MySQL, MariaDB, PostgreSQL, MongoDB, Java/Spring Boot, and PHP/Symfony/Laravel. Former Backend Tech Lead experienced in architecture, technical decisions, deployments, and team guidance. I also integrate AI-assisted development using Claude Code, custom AI agents and reusable skills, OpenAI Codex, and Spec-Driven Development to structure requirements and accelerate software delivery.

CORE TECHNOLOGIES

Frontend	Svelte, Angular, React, JavaScript, TypeScript, HTML/CSS, Micro-frontends, Cypress
Backend	Node.js, NestJS, Java, Spring Boot, PHP, Symfony, Laravel, REST APIs, Microservices
Data & Cloud	MySQL, MariaDB, PostgreSQL, MongoDB, DynamoDB, AWS SQS, EventBridge, RabbitMQ
Engineering	Docker, CI/CD, GitLab, Jenkins, Jest, TDD, BDD/Gherkin, Hexagonal Architecture, Git Flow, Trunk-Based Development
AI Development	Claude Code, AI Agents & Custom Skills, OpenAI Codex, Spec-Driven Development

PROFESSIONAL EXPERIENCE

Full-Stack / JavaScript Developer | W3 IT SOLUTIONS

Feb 2022 - Sep 2026

Yamaha Project

- Developed full-stack functionality using NestJS and Svelte in a microservices-based architecture, including backend services, REST APIs, and frontend features.
- Implemented authentication and authorization flows using JWT and Active Directory.

Sura Seguros Project

- Developed full-stack functionality using NestJS and Angular, building backend services, REST APIs, and frontend features.
- Worked with micro-frontend architecture, BDD with Gherkin, and automated end-to-end testing with Cypress.
- Across both projects, applied Hexagonal Architecture, TDD with Jest, Docker, MongoDB, CI/CD, GitLab, and Trunk-Based Development.

Senior Software Engineer - Backend | W3 IT SOLUTIONS
Nov 2025 - Sep 2026

NocNoc Project - Cross-Border E-commerce

- Developed and maintained Java and Spring Boot microservices integrating international marketplaces with external partner APIs across catalog, orders, and fulfillment operations.
- Worked with AWS services including DynamoDB and Amazon SQS, using EventBridge Scheduler for recurring jobs and automated processes.
- Created custom AI agents and skills using Anthropic Claude and Claude Code, and used reusable team skills as part of an AI-assisted development workflow.
- Applied Spec-Driven Development to turn requirements into structured specifications and implementation plans.

Backend Tech Lead | W3 IT SOLUTIONS
Feb 2021 - Jan 2022

Pickit Project

- Led backend development teams and served as a technical reference for the project.
- Designed technical solutions and microservices, contributing to architecture and technical decision-making.
- Coordinated and executed application deployments, created architecture diagrams and technical documentation, and supported delivery processes with GitLab, Jenkins, and Docker.
- Implemented Git Flow and applied Agile methodologies to organize and coordinate team work.

PHP Developer | W3 IT SOLUTIONS
Sep 2019 - Jan 2022

Pickit Project

- Developed and maintained full-stack functionality using PHP and Symfony 4/5, including REST APIs, core backend services, and frontend features with React.
- Implemented asynchronous messaging and queue-based processing using RabbitMQ.
- Worked with MySQL/MariaDB, Docker, Git, Jenkins, and Jira throughout the development and deployment lifecycle.

PHP Developer | Espinlabs
Oct 2018 - Sep 2019

Capital Federal - Buenos Aires

- Developed and maintained backend functionality and REST APIs across multiple projects using PHP and Laravel 4.2/5.6.
- Used Git and GitLab for version control and collaborative development.

EDUCATION

Degree in Information Systems | Universidad Nacional del Nordeste | 2010 - 2018

Specialization in Software Engineering and Information Technology/System Technology

University Programmer Analyst | Universidad Nacional del Nordeste | 2010 - 2016

Specialization in General Computer Programming
